

- modal_age_regional.nc includes the ensemble mean modal age for six regional tracers NI, TP, ASI, TR, PAC and NAM and is the data for Fig. 2
- tracer_budget_daily_NI.nc includes the daily evolution of the tracer concentration T1, tracer tendency due to resolved dynamics (TAT1), vertical diffusion (VDT1), deep convection (TCOND_T1), and shallow convection (TCONS_T1), calculated tracer tendency due to TEM (TEM), TEM advection (TEM_adv) and TEM eddy (TEM_eddy), as a function of latitude, pressure level and day (the first 201 days). This is the data for Figs. 3-8.
