Biography
Albert Schweitzer was born to Louis and Adele Schillinger Schweitzer on January 14, 1875 in Kaysersberg, Alsace, then part of Germany. From an early age, he was an accomplished organist. He obtained his D. Philosophy in 1899 from the University of Strasbourg and was licensed in theology in 1900. Schweitzer endeavored to be a medical missionary, and began the study of medicine in 1905 at the University of Strasbourg. He received his medical degree in 1911.

In 1912, Schweitzer married Hélène Bresslau. Together they went to Africa and established a hospital in Lambaréné, Gabon in 1913. Hélène and Albert became prisoners of war in 1914 during World War One and returned to Europe in 1918. Albert resumed work in Africa in 1924 and spent the majority of the rest of his life there. Schweitzer continued to expand the hospital and served thousands of Africans at the location.

Throughout his life, Schweitzer was a prolific writer. Notable works include Geschichte der Leben-Jesu-Forschung (The Quest of the Historical Jesus); a study on the music of Johann Sebastian Bach; The Decay and Restoration of Civilization; and Civilization and Ethics.

Schweitzer adhered to the philosophy of Reverence for Life ("Ehrfurcht vor dem Leben"). Author James Brabazon summed up this philosophy:

"Reverence for Life says that the only thing we are really sure of is that we live and want to go on living. This is something that we share with everything else that lives, from elephants to blades of grass—and, of course, every human being. So we are brothers and sisters to all living things, and owe to all of them the same care and respect, that we wish for ourselves."

In 1952, Albert was awarded the Nobel Prize. He used the money received with the prize to expand the hospital and establish a leper colony in Lambaréné. Along with medicine, theology,
philosophy and music, Schweitzer was also outspoken against the dangers of nuclear war and nuclear testing.

Albert Schweitzer died in 1965 and is buried in Lambaréné.
